

# WISExplore: Data Validation for Snapshot Readiness

Presenters: Mary Ann Hudziak and Lisa Arneson

## Day 2: 2:00 - 2:45 PM Questions and Answers:

1. **Dee:** What time on Snapshot day does the information pull? I had 2 EVALs in WIP (work in progress) that I took off of WIP the night before of snapshot day and put back on WIP the morning after snapshot day. Those 2 didn't show up on the Purple (snapshot view). I did a test 2 weeks prior to snapshot day and it worked (those 2 showed up when I had them off of WIP). Currently my CURRENT view (green) is what is accurate for Oct 1.
  - a. Hi Dee-On snapshot day, remember to lock IEPs, if applicable, and submit all data from your SIS to WISEdata by 9 a.m. We start processing at 9 a.m. the day of snapshot.
  - b. **Dee:** Correct, I did lock all IEPs and EVALs. And tested it about 2 weeks prior (and the numbers were correct). Not sure why those 2 students didn't show up on your end. Do I need to correct the SNAPSHOT view if they are correct now under the CURRENT view?
  - c. **DPI:** The snapshot view is "locked" and certified and will not change. Good that they are showing up in Current now for the next snapshot.
2. **LaShon** - When is "Snapshot Day"?
  - a. Our last WISEdata snapshot was Dec 8, 2020. Here are the two dates for WISEdata for 2021 that were just approved: Spring Demographics Snapshot will be June 1, 2021, and the Student snapshot December 7, 2021.
